

BOOZERBEAM™

PRODUCT LINE GUIDE

2.1E HIGH STRENGTH GLULAM

Produced from the finest E-rated SYP lamstock and waterproof adhesives. As strong and as stiff as PSL and LVL. Manufactured in IJC compatible depths for seamless substitution. Wax coated with Liqueal™.

1.9E COM#50 COLUMN

Stronger and more stable than solid sawn posts. Exceptional value in cost vs. performance. Can easily be attached to beams with simple connection detailing.

1.8E/1.9E PRE-CUT HEADER

Factory pre-cut lengths for easy installation. Consistent 3-1/2" and 5-1/2" widths that simplify framing and eliminate the need for blocking. Available in 24F and 26F.

1.8E ORIGINAL GLULAM

The classic BOOZERBEAM™ is built with the dedicated skill of our craftsmen. Produced in traditional glulam widths and depths. Cambered to offset dead load deflection (optional).

1.9E IJC GLULAM

Stronger than 1.7E Timberstrand, 1.8E LVL and 1.8E glulam. Can be seamlessly integrated into any engineered wood system.

1.8E IJC GLULAM

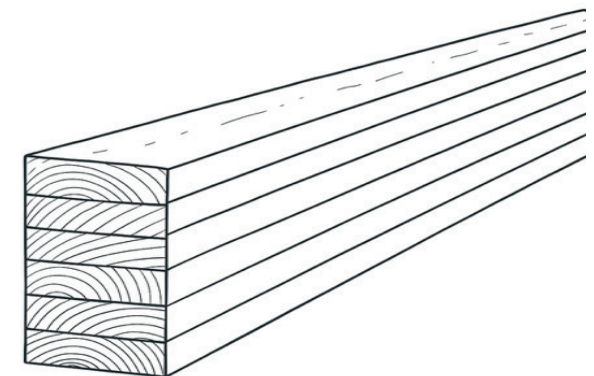

Manufactured in depths that match standard I-joist framing. Allowing a flush and smooth plane for floors and ceilings.

the outsider™

Beams, joists, and columns pressure treated with Copper-Nap in order to provide resistance to insects, decay, mold, and mildew. Can be used in both "wet-use" and "dry-use" applications.

1.6E WINDOW & DOOR HEADER

Stronger than LSL and Headers made from 2-ply dimensional lumber. Consistently straight and stable. No assembly required.

Certified & Made in USA
